Thanks its been a great project to do as it was 75% damaged, and just goes to show what can be done nothing is impossible, thanks again to AEB for time given t point me in the right direction on reconstruction of a great glider.

And now its programmed on my latest tx, it wont leave my hand except when AEB wants to fly the Klemm, ha ha !!!.

great pictures Darren thanks.

Stephen

Stephen, you must be proud of that repair,  
Looking forward to see it live!

Geoff

Hi Steven

Well done on the Dart 17 maiden today as good as new and a happy ending.

Darren

I let you in to a secret, there spray cans made up for me by a paint shop , and then Lacquer afterwards that gives the paint the nice finish.

Morning Steve

If the weather's ok I'll pop up.

Darren

I am hoping if the weathers ok but still got to fill in around the fixed wheel and fit power switches, dash might be fitted after still some work to do on it, other then that yes if I can get the test pilot and tug pilot together but not asked yet until I know it will ready.

The other ridea is to ring AEB to set the Dart up before the weekend, Ummm !!, what do you think John.

Other then that hope to also get some GPS in.

You coming over this weekend !!

Over the last 14 days the Dart has now been painted and lacquered, and some decals fitted, last Sat another trip round to AEB's to try and fit the now fixed wheel, replacing the retract.

This like some of the other finishing jobs on the Dart was a pain and required more then one pair of hands, some pictures will follow.
