What an excellent video. The models are all superb and a credit to you French modellers. Nice to see you with your Nord and the flight videos and so surprised to hear you speak French so well 🤔😄😄

Marc - do you have any drawings of the airbrakes?

### Re: Guerchais Roche 70 1:3 The End !

by **VinceC**

Posted: **22 Sep 2015, 08:33**

Did you manage to make the unusual compass?

Marc,

What a superb model and a brilliant maiden - you must be well pleased.

Wonderful Marc. So pleased we were able to help realise your dreams. Hope you have many years of smiles

Vince

For others reading this post, the model kit was supplied by Cliff (Laser Cut Sailplanes) free of charge for a test build. The free plan will be available shortly

Thank you Marc for posting the info on the canopy!  
Will use this later on the Milan canopy.  
Well done job!!!

Noël

Marc,

What a beautiful model - you must be really pleased!

I hope she flies as well as she looks.

So am I due to you Vince, Cliff and Ivan. I do appreciate this form of collaboration. I hope we can bring the last modifications soon to the drawings and cut parts. I'll make the maiden as soon as I am OK. Vince you can use the pictures if needed.

Thanks for your comment Chris. Yes indeed, this museum is quite fascinating. The modellers are welcome and the documentation department is a mine for us. Possibility to get scanned documents for a reasonable amount of money that helps the museum to go on.. There is also a permanent exhibition of our modelling world (models, motors, radio and so on.. My baby Albatross is in the museum now ! It will survive his creator ! 😊 )

Beautiful job, Marc, well done...! (Fascinating museum, too)

### Re: Guerchais Roche 70 1:3 The End !

by **march**

Posted: **07 Apr 2015, 07:42**

The GR70 is completed. She made her first coming out in the scale event in the Angers museum last WE. Unfortunately we couldn't fly this year due to too small area and wrong wing direction ( look at the amazing photo reports link, you must go and see the Angers museum ! )

## Re: Guerchais Roche 70 1:3 The End !

by **march**

Posted: **02 Apr 2015, 08:59**

Thanks guys, but many little details to complete. I need to find a solution to make round corners and joints on canopy strips , insert many screws and painting for strips are too glossy. I hoped to make the maiden flight in the Angers Musée GPPA scale event this WE but I had a little accident ( bad fall and a bit injured, not serious but painful) and I am unable to make efforts so it will be delayed to end of april I think . 🙄😡 Sorry !

## Re: Guerchais Roche 70 1:3 The End !

by **VinceC**

Posted: **01 Apr 2015, 12:10**

Exceptionally well done Marc 🧐

## Re: Guerchais Roche 70 1:3 The End !

by **march**

Posted: **01 Apr 2015, 11:37**

Canopy is completed with ABS white strips, an army of little screws or rivets is to come

## Re: Guerchais Roche 70 1:3 The End !

by **VinceC**

Posted: **29 Mar 2015, 19:04**

Very nice Marc

## Re: Guerchais Roche 70 1:3 The End !

by **march**

Posted: **29 Mar 2015, 16:40**

Work is coming to its end on the canopy. All the transparent panels are cut and glued separately. A white strip to be fixed over. The home-made "ventilators" allow acces to the lock system.

### Re: Guerchais Roche 70 1:3 The End !

by **VinceC**

Posted: **24 Mar 2015, 18:38**

Thanks Marc, I will update the drawing.

### Re: Guerchais Roche 70 1:3 The End !

by **march**

Posted: **24 Mar 2015, 17:01**

New finition step. Painting is finished. Servos are wired and some are set now on the transmitter..

Vince, I've found a little picture showing the red pattern on stabilizator and fin, if you want to modify the 3 view drawings . (You can see it on the pdf doc with the internal structure of the GR)

### Re: Guerchais Roche 70 1:3 The End !

by **march**

Posted: **22 Mar 2015, 13:01**

I have no other pictures. This is the first step. Soldered 4mm brass tube, then I add ( with neoprène contact glue) some 0,3 aluminium strips(10mm wide) then 0,8mm wood strips (6mm wide) to accept the transparent material depth . All pieces of glass are cut separately) then I'll add another 0,3 mm aluminium strips over( 10mm wide glued and fixed with screws or rivets)

by **march**

Posted: **22 Mar 2015, 11:27**

The finition step is coming to its end.Wings are painted and fuselage too with its logo. Glasses to the canopy are about to be fixed and that project will be completed for the building part.

maiden soon... 🤔 😊

Rob, not able to attach images on this version !!!!! no "add files" on the window..
